PAINT PROTECTION FILM / LIMITED WARRANTY

1. Who and what this warranty covers

Proma Technology Company (the “Company”) provides this Limited Warranty for genuine AeroCloak™ Paint Protection Film (the “Film”) to the original vehicle owner and subsequent owners under Section 5. This Limited Warranty applies only to genuine AeroCloak™ Paint Protection Film professionally installed by an installer authorized by the Company or its authorized distributor in North America, in accordance with the Company’s recommended installation procedures.

Effective installations. This Limited Warranty applies to installations completed on or after November 11, 2026. Coverage begins on the original installation date established by records described in Section 7 and continues for the applicable period in Section 2.

Eligible surfaces. Eligibility is determined separately for each component. On painted components, Film must be installed on original factory-applied paint and clear coat. Film installed on factory headlight lenses and the listed trim components in Section 4 is also eligible; the factory-paint requirement applies to painted surfaces only. A repaired, repainted, refinished or non-original finish on one component does not disqualify Film on other components that independently qualify. This warranty covers the Film only, not paint, clear coat, underlying surfaces, installation workmanship or damage the Film is designed to absorb.

2. Warranty period

PRESTIGE: 8 years | PLUS: 8 years | PARAMOUNT: 8 years

PREMIUM: 5 years | PERFORMANCE: 5 years | Color PPF: 5 years

3. What is covered

During the applicable warranty period, the Company covers only the following conditions when attributable to a verified defect in Film materials or manufacture:

Localized abnormal yellowing. Conspicuous, materially greater yellow discoloration in one or more localized Film-covered areas than in adjacent or otherwise reasonably comparable Film-covered areas, producing a distinct uneven contrast attributable to a verified material or manufacturing defect. Ordinary use and environmental exposure may cause some yellowing. Mild, gradual, relatively uniform or overall yellowing from aging, sunlight, UV exposure or environmental conditions is not covered. Photographs, comparable installed areas, retained samples and other reliable evidence may assist assessment; an unexposed same-batch sample is not mandatory.

Cracking. Cracks in Film or top coat.

Delamination. Separation of Film layers.

Coating peeling. Separation of the Film top coat from otherwise intact Film.

Bubbling. Persistent bubbles or blisters caused by defective Film or adhesive after normal curing; excludes trapped moisture, dirt, contaminants and improper installation.

Adhesive-related edge lifting. Lifting attributable to adhesive failure; excludes insufficient edge wrapping, contamination, over-stretching or improper installation.

4. What we will do

Replacement and labor allowance. For every approved claim, the Company supplies replacement Film for the applicable scope, as further specified in this Section 4, plus an additional quantity of Film equal to the approved replacement quantity as in-kind compensation toward removal and reinstallation labor. Total Film supplied is twice the approved replacement quantity (2×). No separate cash labor reimbursement is provided except as required by applicable law.

Original installation record. Each original installation is assessed separately. Only eligible Film documented in the same original installation may be included in replacement scope or component count. Separate jobs, installations at different times and later additions cannot be combined, even on the same vehicle.

Other covered defects — one or two major components. For cracking, delamination, coating peeling, bubbling or adhesive-related edge lifting, when the same verified covered defect affects one or two distinct eligible major components in the same original installation, replacement covers each affected component's entire documented original Film-covered area, not merely the defective spot.

Other covered defects — three or more major components. When the same verified covered defect affects at least three distinct eligible major components in the same original installation, replacement covers all eligible Film-covered areas documented in that installation, including eligible small components. Cracking, delamination, coating peeling, bubbling and adhesive-related edge lifting are five separate defect categories; they cannot be combined to reach the threshold.

Localized abnormal yellowing — first three years. If a qualifying written claim is first submitted on or before the third anniversary of original installation: (a) yellowing affecting one or two distinct eligible major components qualifies for replacement of each affected component's entire documented original Film-covered area; (b) yellowing affecting three or more distinct eligible major components in the same original installation qualifies for replacement of all eligible Film-covered areas documented in that installation, including eligible small components.

Localized abnormal yellowing — after three years. If a qualifying written claim is first submitted after the third anniversary of original installation but within the applicable warranty period, replacement is limited to the entire documented original Film-covered area of each eligible component exhibiting verified localized abnormal yellowing, regardless of the number of affected components. The three-component expanded replacement remedy does not apply to yellowing claims submitted after the third anniversary.

Small-component claims. A qualifying defect or localized abnormal yellowing confined to an eligible small component qualifies for replacement of that small component's documented original Film-covered area. Small components never count toward the three-major-component threshold. The equal additional Film allowance applies to every approved claim, including yellowing claims submitted after three years.

Counting major components. Each individually identifiable major exterior body component counts once: hood; roof; trunk lid or liftgate; front bumper; rear bumper; each front fender; each door; each rear quarter panel; each distinct rocker panel; and each factory headlight lens (left and right separately). Left and right separate components count separately. Multiple Film pieces, seams, defect spots or curved sections on one component do not increase the count. The entire front bumper counts as one component; the front and rear bumpers together count as two.

Small components. Eligible small components are limited to mirror housings, door handles, factory exterior trim or molding, emblems, A-pillar trim, door sills, and luggage sill/threshold protection. No other small accessories are eligible. These components do not count toward the three-major-component threshold but are

included in expanded replacement when applicable. Factory headlight lenses are eligible without factory paint and count separately as major components. The factory-paint requirement applies only to painted surfaces.

Replacement quantity. Film quantities are determined by verified original coverage area, product dimensions and reasonable cutting and installation waste allowances, not solely by quantities reported or requested by an installer. The equal additional Film allowance is calculated from the approved replacement quantity; total Film supplied is twice that quantity, without a fixed roll-count cap.

Claim submission date. The submission date is when the owner first submits a written claim within the warranty period reasonably identifying the vehicle, Film product, installation information and alleged defect. Reasonable supporting documents supplied later do not change that date. For yellowing, this date determines the applicable three-year remedy.

Shipping. For approved claims, the Company pays reasonable standard shipping charges for replacement Film within North America and shipping charges for defective Film the Company requires returned for assessment. Optional or expedited shipping is excluded unless approved in writing.

Approval and replacement product. Written Company approval is required before warranty work begins; work begun before approval is not reimbursed. If the original product is unavailable, a comparable AeroCloak product may be supplied. For discontinued Color PPF, a comparable alternative color may be supplied; exact matching is not guaranteed. Replacement does not restart or extend the original warranty period.

5. Transfer to a new owner

This warranty transfers with the vehicle for the remainder of its original term. The new owner must provide proof of ownership and reliable purchase, installation and product-identification records meeting Section 7. Certificate, invoice and installer electronic records may supplement one another.

6. What is not covered

Excluded: damage to paint, clear coat or underlying surfaces; paint or clear coat lifting during Film removal; pre-existing damage, contamination or repairs; defects apparent before installation; environmental stains; impact, chips, scratches, scuffs or abrasion; mineral water spots; collision, vandalism, fire, hail, flood, rail dust or overspray; harsh chemicals, solvents, abrasives, extreme temperatures or improper care; improper storage, handling or installation; components repaired, repainted or replaced after installation; non-automotive use; and claims where product and installation identity cannot reasonably be established under Section 7. For Color PPF, fading, color changes other than covered localized abnormal yellowing, and original batch-to-batch color differences are excluded. For all Film products, ordinary, gradual, relatively uniform or overall aging-related yellowing is excluded; verified localized abnormal yellowing remains covered under Sections 3 and 4. Surface eligibility is determined component by component under Section 1.

CLAIMS, LIMITATIONS & CONTACT

7. How to make a claim

1. Contact the authorized installer or email info@promatech.co before the warranty expires. The initial written claim date is determined under Section 4.

2. Provide owner contact details, vehicle make, model and VIN, and reliable records collectively establishing purchase, product series, original installation date, original Film-covered components and Film identity. Separate installation jobs must be distinguishable. Certificate, invoice and installer electronic records may supplement one another; a missing certificate or invoice alone does not bar a claim when eligibility is otherwise reliably

established.

3. The installer should record roll batch numbers and help retrieve them from purchase, installation or inventory records. A missing batch number alone does not justify denial if Film identity and eligibility can otherwise be verified.

4. Provide wide-angle photographs identifying affected components and close-ups of the alleged defects. For localized abnormal yellowing, show affected and adjacent or comparable Film-covered areas when practicable. Reasonable later evidence does not change the initial written claim date.

5. The Company may inspect Film directly or through an authorized representative and require removed Film to be returned. Company-paid shipping for required returns is addressed in Section 4.

6. The Company acknowledges receipt within three business days and normally decides within fifteen business days after receiving information reasonably necessary for review. Approved replacement scope and equal additional Film are confirmed in writing and coordinated with an approved installer.

8. Limits of this warranty

This Limited Warranty is the only express warranty the Company makes for the Film. Any implied warranties, including merchantability and fitness for a particular purpose, are limited in duration to the applicable warranty period in Section 2, to the extent permitted by law.

Some States do not allow limitations on how long an implied warranty lasts, so the above limitation may not apply to you.

The Company’s obligation is to supply the replacement Film and equal additional Film specified in Section 4. These are the exclusive remedies under this Limited Warranty, subject to applicable law. The Company is not liable for incidental or consequential damages, including loss of vehicle use, rental or transportation costs, diminished value, lost time or paint repair costs, to the extent permitted by law.

Some States do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you.

Technical information and recommendations are general reference. Installers are responsible for suitability for each application. Nothing in this Limited Warranty excludes or limits rights or liabilities that cannot be excluded or limited under applicable law.

This warranty gives you specific legal rights, and you may also have other rights which vary from State to State.

Roll batch number(s) _____

Invoice / Installation record reference _____

Film finish _____

Original Film-covered components

Check all installed; attach a coverage diagram for partial coverage:

- ☐ Hood
- ☐ Roof
- ☐ Front bumper
- ☐ Rear bumper
- ☐ Trunk / Liftgate
- ☐ Left front fender
- ☐ Right front fender
- ☐ Left front door
- ☐ Right front door
- ☐ Left rear door
- ☐ Right rear door
- ☐ Left rear quarter
- ☐ Right rear quarter
- ☐ Left rocker panel
- ☐ Right rocker panel
- ☐ Left headlight
- ☐ Right headlight
- ☐ Mirrors / handles
- ☐ A-pillars
- ☐ Door sills / luggage sill
- ☐ Other trim (Section 4 only)

Factory paint verification — installer confirmation

For painted components only, I confirm that eligible components had original factory-applied paint and clear coat at installation. Factory headlight lenses and listed trim are eligible without factory paint. Repainted, refinished or unverified painted components must be identified separately.

Eligible OEM-painted components: _____

Repainted / refinished / unverified components: _____

Installer signature / Date: _____ Owner signature / Date: _____

Important coverage summary

For cracking, delamination, coating peeling, bubbling and adhesive-related edge lifting: 1–2 affected major components qualify for replacement of their documented original Film-covered areas; 3 or more major components with the same verified defect qualify for all eligible Film from the same original installation, including eligible small components. Localized abnormal yellowing: For qualifying claims first submitted on or before the third anniversary of original installation, 1–2 affected major components qualify for their original Film-covered areas; 3 or more qualify for all eligible Film in the same original installation. For claims first submitted after three years but within the warranty term, only the original Film-covered areas of affected eligible components are replaced, regardless of count. Normal gradual or overall yellowing is excluded. Left and right factory headlight lenses each count as a major component toward three; other listed small components may qualify independently but do not count. Separate installations cannot be combined. Every approved claim includes additional Film equal to the approved replacement quantity (total 2× Film), plus reasonable standard North American replacement shipping. Verified coverage, product dimensions and reasonable cutting allowances determine quantities. Full warranty terms control; vehicle paint is not covered. Questions: info@promatech.co
