INVISIBLE GLASS ARMOR / LIMITED WARRANTY

1. Eligibility and effective date

This Limited Warranty is issued by Proma Technology Company (the “Company”) for genuine AeroCloak™ Invisible Glass Armor automotive glass protection Film (the “Film”). It applies only to installations completed on or after November 11, 2026, in North America, by an installer authorized by the Company or its authorized distributor, in accordance with the Company’s recommended installation procedures.

This warranty benefits the original vehicle owner and subsequent owners under Section 5. It covers only the documented original Film installation on eligible vehicle glass. The vehicle glass itself, its factory coatings, and any non-Film components are not warranted by this document.

2. Warranty period

The Limited Warranty period is two (2) years beginning on the original installation date. Replacement Film does not restart or extend the original warranty period.

3. Covered manufacturing defects

The following are covered only when the Company verifies that the condition results from a defect in Film materials or manufacture under normal automotive use: (a) cracking of the Film or its top coat; (b) delamination or separation of Film layers; (c) peeling or separation of the Film top coat; (d) persistent bubbling attributable to defective Film or adhesive after normal curing; and (e) adhesive-related edge lifting.

Severe yellowing or localized abnormal yellowing is covered when verified as a Film material or manufacturing defect. Severe yellowing means conspicuous, substantial yellow discoloration materially beyond the ordinary aging expected for the Film under comparable use. Localized abnormal yellowing means one or more Film-covered glass areas become conspicuously and disproportionately more yellow than adjacent or otherwise comparable Film-covered areas, producing a distinct color difference. Normal slight, gradual, or relatively uniform aging-related yellowing is not covered. Visible color change alone does not establish a manufacturing defect.

Abnormal haze, loss of transparency or optical clarity, or visual distortion is covered only if it arises during the two-year warranty period from a verified Film material or manufacturing defect and causes visibility through the Film-covered front windshield to fall below the applicable local governmental legal standard for windshield visibility or optical performance. Aesthetic haze or distortion that does not cause this legal-standard failure is not covered under this optical-defect provision. The Company may require objective testing or inspection to determine compliance.

Bubbles caused by installation moisture, trapped contamination or inadequate curing, and lifting caused by poor preparation, insufficient edge adhesion from installation, excessive stretching or improper handling, are not covered.

4. Warranty remedy and calculation

For each eligible glass pane exhibiting a verified covered manufacturing defect, the Company will provide replacement Film only for the area actually covered by Film in the documented original installation on that pane, including reasonable cutting allowance, and not for the full glass dimensions unless the entire pane was originally covered. The Company will also pay a fixed US $50 installation labor allowance per approved glass pane. For example, two separately approved glass panes qualify for replacement Film for each pane plus US $100 total labor allowance.

Each separately identifiable windshield, rear window, side window, quarter window or other individual vehicle glass pane is evaluated separately. Multiple defects on the same pane do not create multiple US $50 labor allowances. The Company does not replace Film on unaffected glass panes merely because another pane is defective.

Replacement Film quantity is determined by verified original actual Film-covered area, product dimensions and reasonable cutting allowance, not the full glass-pane size or solely by a shop’s claimed material usage. The labor allowance is a fixed cash amount per approved pane; no additional equal-quantity Film labor compensation applies to this product.

The Company pays reasonable standard shipping for approved replacement Film within North America and shipping for defective Film the Company specifically requests be returned for evaluation. Expedited or optional shipping is excluded unless approved in writing. Written Company approval is required before warranty replacement work begins. If the original product is unavailable, a reasonably comparable AeroCloak™ glass protection Film may be supplied.

5. Transfer to a new owner

This warranty transfers with the vehicle for the remainder of the original two-year term. A subsequent owner must provide reliable ownership, installation and product-identification records. The certificate, invoice and installer records may supplement one another.

6. What is not covered

This warranty excludes damage to the glass itself; existing glass chips, cracks, scratches or defects; Film damage during removal; collision, road debris, impact, vandalism, fire, hail, flood, abrasion, harsh chemicals, solvents, improper cleaning, extreme temperatures or misuse; mineral or environmental deposits; installation defects, contamination, trapped moisture, improper curing, inadequate edge preparation, or other failure to follow recommended installation procedures; and Film removed, repaired, replaced or modified without Company authorization.

Normal wear includes wiper wear, wiper-blade scratching, damage from ice scraper use and automatic car-wash brushes. These conditions are excluded, including when such wear is mistaken for coating peeling. Normal aging-related yellowing and ordinary weathering are also excluded.

The Film may reduce, but does not prevent, glass chips or cracks. Glass repair or replacement costs are not covered. If a glass pane is replaced, warranty coverage for Film on the removed pane ends; any Film subsequently installed on replacement glass requires its own eligible original installation to qualify for a new warranty.

Malfunction, false warnings or errors, and recalibration costs involving advanced driver-assistance systems (ADAS), windshield cameras, head-up displays (HUD), rain sensors and other vehicle sensors or electronics arising from Film installation are excluded to the extent permitted by applicable law. Installers must follow Company installation procedures, including keeping Film clear of camera and sensor zones where required by those procedures. Damage to heating elements, antennas, sensors, tint or other existing coatings is excluded unless applicable law requires otherwise.

The installer and vehicle owner are responsible for compliance with applicable state, provincial and local vehicle window-film laws. The Company does not warrant that installation or use of the Film complies with every applicable jurisdiction’s legal requirements. This statement does not limit any non-waivable rights under applicable law.

7. How to submit a claim

Contact the original authorized installer or email info@promatech.co within the applicable warranty period. Provide the owner’s name, contact information, VIN, original installation date, authorized installer, product and batch identification (if available), invoice or installation record, identification of each affected glass pane, and clear photographs showing the alleged defect and overall glass coverage.

The claim submission date is the date the owner first submits a written claim during the warranty period reasonably identifying the vehicle, Film product, installation information and alleged defect. Reasonable supporting documents provided later do not change that date. The Company aims to acknowledge a claim within three (3) business days and generally provide a decision within fifteen (15) business days after receiving reasonably required information. The Company may request additional photographs, inspection or return of Film material.

8. Limits of this warranty

This Limited Warranty is the Company’s express written warranty for the Film. To the extent permitted by law, any implied warranty is limited to the duration of this Limited Warranty. The replacement Film and US $50 per approved glass pane labor allowance described in Section 4 are the exclusive remedies under this Limited Warranty, except where applicable law requires otherwise. To the extent permitted by law, the Company is not liable for incidental or consequential damages.

Some States do not allow limitations on how long an implied warranty lasts, so the above limitation may not apply to you.

Some States do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you.

This warranty gives you specific legal rights, and you may also have other rights which vary from State to State.

Important coverage summary

Two-year limited warranty for verified Film defects: cracking, delamination, coating peeling, qualifying bubbling, adhesive-related edge lifting, severe or localized abnormal yellowing, and qualifying optical failure below applicable local legal standards. For each approved pane, replacement Film covers only its original actual Film-covered area (plus reasonable cutting allowance), together with US $50 labor compensation. Two approved panes receive US $100. Unaffected panes are not replaced. Full warranty terms control.
